Mumbai, Maharashtra, India

PROFESSIONAL SUMMARY

Data Science and ML Engineering student with proven ability to build end-to-end intelligent solutions. Experienced in developing NLP systems, predictive models, and interactive data visualizations. Strong foundation in Python, machine learning frameworks, and modern web technologies. Seeking to leverage technical expertise and passion for innovation in a challenging role at Google.

EDUCATION

Vidyalankar Institute of Technology <i>Bachelor of Technology in Information Technology; GPA: 9.58/10</i>	Mumbai Aug 2023 – Aug 2027
Matoshree Prabhodini Jr College of Science <i>Higher Secondary Certificate (HSC); 69.3%</i>	Thane 2023
DAV Public School, Airoli <i>SSC ; 69.3%</i>	Airoli, Navi Mumbai 2021

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL, HTML/CSS
ML/AI Frameworks: TensorFlow, Scikit-Learn, spaCy, OpenAI Whisper, NLP
Data Science & Analytics: Pandas, NumPy, Matplotlib, Folium, GeoPandas, Power BI
Web Frameworks & APIs: FastAPI, Flask, Streamlit, Google Sheets API, RESTful APIs
Developer Tools: Git, GitHub, Linux, Jupyter, VS Code
Core Competencies: Machine Learning, Deep Learning, Data Visualization

PROJECTS

AI Resume Video Analyzer <i>NLP, spaCy, FastAPI, OpenAI Whisper</i>	GitHub
- Engineered AI-powered video analysis system that transcribes resume videos to text and extracts key technical skills using advanced NLP techniques - Independently architected and implemented complete AI/ML and backend modules within collaborative team environment - Designed RESTful API endpoints using FastAPI for seamless integration and optimized processing pipeline	
Mumbai House Price Predictor & Visualizer <i>Scikit-Learn, Pandas, Folium, Streamlit</i>	GitHub Live
- Developed end-to-end machine learning solution for predicting residential property prices across Mumbai regions with interactive geospatial visualizations - Implemented feature engineering and model optimization achieving strong predictive accuracy on real estate data - Built interactive web application with Streamlit and Folium for dynamic map-based price exploration	
Restaurant Sentiment Analyzer <i>Linear SVM, NLP, Google Sheets API, Streamlit</i>	GitHub
- Implemented text classification system using Linear SVM to categorize customer reviews with high accuracy - Automated sentiment-based data organization by integrating Google Sheets API for real-time business insights - Deployed user-friendly Streamlit interface enabling non-technical users to analyze customer feedback	

ACHIEVEMENTS & LEADERSHIP

1st Place - CDAC Python Programming Course	2024
Secured top rank among peers demonstrating exceptional programming proficiency and problem-solving skills	
1st Place - Object Oriented Programming (Java), Semester II	2024
Achieved highest marks in OOP fundamentals, showcasing strong grasp of software design principles
